

Fierce Protection for Home & Health—Thieves® Products

In this day, when dangerous diseases and virulent viruses challenge our health from all sides, it is imperative that we build a “Zone of Protection” around home and family.

I imagine that Zone as a force field so strong that viruses, bacteria and sickness bounce off harmlessly. It protects me everywhere I go, because I use the **Thieves® Family of Products**. This collection of home and personal care products from Young Living® will:

- Boost your immune system with Thieves-enhanced personal care products
- Reduce the spread of germs with convenient hand and surface cleaners

This newsletter shows many of the Thieves products that Young Living customers depend on to create their own Essential Zones of Protection. You can too—at home, at work, when traveling—wherever you go. But first, let me tell you the story of Thieves.

How Thieves Came to Young Living

Thieves refers to a band of legendary grave robbers in 15th century France. These men—who may have been spice merchants—successfully avoided contracting the plague by rubbing oils of **Clove, Rosemary and Cinnamon** on their bodies before robbing their victims.¹ After researching numerous stories written about the grave robbers and other medieval texts,

THIEVES IS...PROVEN

Over 500 clinical studies prove the antimicrobial effectiveness of the essential oils in Thieves.

POWERFUL

Tens of thousands of YL customers swear by Thieves for staying healthy during cold and flu season.

PORTABLE

Wipes, spray, hand purifier all tuck into purse, drawer or bag for protection wherever you go.

PURE & NON-TOXIC

Absolutely all natural and chemical-free.

Dr. D. Gary Young developed the formula now known as **Thieves** essential oil blend. And now, today's scientists confirm that the same essential oils the robbers used—**Clove, Lemon, Cinnamon Bark, Eucalyptus** and **Rosemary**—are powerful antimicrobial agents.

Hundreds of Scientific Reports Confirm Antimicrobial Action of Essential Oils in Thieves Blend

“In recent years (1987–2001) a large number of essential oils and their constituents have been investigated for their antimicrobial properties...in more than **500** reports. Essential oils of spices and herbs (**Thyme, Oregano, Mint, Cinnamon, Sage** and **Clove**) were found to possess the strongest antimicrobial properties among the many tested.”²

Thieves essential oil blend was proven to have a **99.96%** effective rate against airborne bacteria, during rigorous testing at **Weber State University**, Ogden, Utah.³

Now the power of Thieves can be found in over a dozen products, from

How to Create a Zone of Protection with Thieves Products

Thieves Autoship Pack saves on products you'll use every day

toothpaste and mouthwash to cleaning products, hand soaps and even throat lozenges. The Thieves Family of Products offers safe, natural alternatives to toxic, mass-marketed personal and home care products.

Read on for quick tips on using the personal care products at home and the hand/surface cleaners on the go.

PERSONAL CARE AT HOME

- Thieves essential oil blend
- Dentarome Toothpaste
- Fresh Essence Plus Mouthwash
- Thieves Hard & Soft Lozenges
- Thieves Foaming Hand Soap

Boost Immune System by Applying Thieves Oil Topically

In the morning and at bedtime, apply 1-2 drops of Thieves to the soles of your feet. Then, cup hands around your nose and inhale deeply for 2-3 minutes.

Kill Germs that Cause Bad Breath, Gum Disease

Clean teeth, fresh mouth, no harsh abrasives or alcohol are reasons you'll like all three **Dentarome** toothpastes and **Fresh Essence Plus Mouthwash**. However, what you'll appreciate most is that they deliver Thieves oil directly to the gumline.

According to periodontist Robert Hoskyns, DMD, "Certain essential oils kill the bacteria around the gumline which cause gingivitis and periodontal disease. The [essential] oils' primary benefit to patients is the acceleration of gum healing and shrinkage due to their antibacterial action."⁴

Soothe Throat, Freshen Breath

Thieves Soft and Hard Lozenges dissolve away scratchy throats and perk up your mouth. Perfectly portable, powerfully effective.

Attack the #1 Carrier of Colds & Flu

Frequent handwashing is the best way to avoid contracting colds and flu, according to experts.⁵ And Thieves Foaming Hand Soap can boost the effectiveness of your handwashing.

But don't let the soft, creamy foam fool you: This is no lightweight in the germ-busting department. It has all the antimicrobial power of Thieves in a great-smelling soap. (Thieves bar soap also available.) Sold in 3 paks so you can have one by every sink.

This trio spells trouble for germs! Waterless Hand Purifier, Spray, Wipes.

DEFENSE ON THE GO

- Thieves Waterless Hand Purifier
- Thieves Wipes
- Thieves Spray

Banish Bacteria From Your Domain

"The average desk area in an office has 400 times more bacteria on it than the average toilet seat."^{5,6} Enough said? Periodic use of **Thieves Wipes** will make a big dent in the number of unwelcome visitors on your computer keyboard, phone.

Take Thieves Wipes to the grocery store, too. I always give the grocery cart handle and seat a good once-over. After you've loaded your groceries in the car, make sure that all you're taking home is the groceries. Apply a nickle-sized drop of **Thieves Waterless Hand Purifier** to the palm of your hand and rub until completely absorbed.

Now you can see how to begin your Zone of Protection, with help from the Thieves Family. To get started today, try the Thieves Autoship Pack. You'll stock up at great savings.
